PREPARATION FOR TREATMENT - COMMON INSECTS

It is necessary to remove all pets, cover fish tanks and remain out of the unit for approximately 4 – 6 hours following the treatment.

Method of treatment: Spray treatment

NOTE: Do not spray any insecticides on or near the area which has been treated & **do not** use any strong cleaners near the location treated.

Preparation

Perimeters of all rooms should be accessible - including all furniture being pulled at least 2 feet away from all the walls.

Heavy items such as wall units etc may be left in place.
