PREPARATION FOR TREATMENT - GRAIN BEETLES

It is necessary to remove all pets, cover fish tanks and remain out of the unit for approximately 4 – 6 hours following the treatment.

Empty upper and lower kitchen cupboards.

All dried food items should be inspected & food products that are not infested should be placed in plastic containers. Any products which have not been used, or have been opened for a prolonged period of time, should be disposed of.

Wipe down the surface of cupboards and vacuum all cracks and seams.

Wipe all product surfaces, either when removing products or prior to placing items into the cupboards.

After Treatment

Prior to replacing items in cupboards, line shelves with either a loose shelf liner or wax paper and return items.
