

PREPARATION FOR TREATMENT - FLEAS

It is necessary to remove all pets, cover fish tanks and remain out of the unit for approximately 4 – 6 hours following the treatment.

Method of treatment: Residual Spray Treatment.

Vacuum all floor surfaces thoroughly prior to treatment, this includes along baseboards, carpet edges, under beds and heating vents. Dispose of vacuum bag immediately upon completion.

Pets should be treated by vet prior to or on the date of service. All

pet bedding should be laundered prior to treatment.

Remove all small items off floor surfaces – toys, slippers, etc. Empty

the bottom of all closets.

**It is essential that the above preparations be completed.
Otherwise the work will not be performed.**
