

## How to prepare your home for an Exterior Spray Treatment

**Important to know:** All pets must be safely secured while technician is on site.

### Exterior Preparations Steps:

For treatment to be successful the following preparation must be completed prior to service.

1. Move all planters, patio furniture etc. 12" (30cm) away from the outside walls.

Please be sure to exercise safety first and do not attempt to move very large/heavy items/furniture. We will do our best to work around the area.

2. All windows and doors must be closed during and after treatment for at least 1 hour.
3. Avoid children and pets from playing outside until the product is dry (1 hour after treatment)

**Acknowledgement;** I agree that under no circumstances shall PEST CONTROL PLUS be held liable for direct or indirect injuries or damage to the building premise or contents stemming from the treatment. I, the client, waive any claims of liability against PEST CONTROL PLUS directly or indirectly caused by PEST CONTROL PLUS products, equipment or staff.
