

## How to prepare your home for a Common Insect Spray

**Important to know:** It is required for you to remove all pets and cover fish tanks. You must stay out of the unit during and after treatment for 4 hours. Persons with underlying health conditions should consult their family physician where they have concerns regarding re-entry time. Upon re-entry, please open windows for 20 min to properly ventilate the treated rooms.

### Preparations Steps:

For treatment to be successful the following preparation must be completed prior to service. Sanitation is essential.

1. **Clean kitchen thoroughly, including floor, stove and counter tops.**
2. **Pull out refrigerator, stove, etc. and clean behind and underneath. All cleaning**
3. **should be done before, not after treatment.**
4. **Everything should be removed from Lower Kitchen & Washroom cupboards**
5. **Clear along baseboards and window frames**

### After Our Treatment Is Complete:

1. Thoroughly wash (with soap and water) all exposed eating surfaces (including table and
2. counter tops) and any exposed dishes or silverware.
3. Do not leave empty milk or beverage bottles inside.
4. Keep areas under and behind stoves and refrigerators clean.
5. Do not allow food and garbage to
6. accumulate in areas where pest feed or hide.
6. Pet food should be stored in sealed containers.

**Acknowledgement;** I agree that under no circumstances shall PEST CONTROL PLUS be held liable for direct or indirect injuries or damage to the building premise or contents stemming from the treatment. I, the client, waive any claims of liability against PEST CONTROL PLUS directly or indirectly caused by PEST CONTROL PLUS products, equipment or staff.
