

## **CANINE PRE-INSPECTION PREPARATION CHECKLIST**

It is our goal to provide you with the most accurate canine inspection. On the day of your appointment you too can assist the canine team in conducting the inspection. Your help with the items below will ensure that we complete the inspection in a timely manner and provide you with the best service possible. Thank you in advance for your cooperation!

- 15 minutes prior to inspection all ceiling fans and other fans should be turned off.
- 15 minutes prior to inspection air conditioner should be turned off.
- 15 minutes prior to inspection all windows and doors should be closed.

**The above items reduce air flow and increase accuracy.**

- All pets should be created, contained or removed while the inspection is in progress.
- Remove all pet food including food and water bowls, plus any litter boxes as well as pet toys (put in bathroom).

**Your pets, their food and toys can be a distraction to our dogs.**

- Store any household cleaning products or chemicals in an enclosed container or cabinet that the dog cannot come into contact with. These products may be toxic to dogs.
- The more area the dog can search, the more thorough the inspection, therefore minimize clutter especially around walls and furniture.
- On the day of your inspection please refrain from using any scented cleaning products or room fresheners, incents, candles.
- On the day of your inspection you will be asked to step into the hall while the K9 team is in your unit.

**Anyone other than the K9 team in the unit during the inspection can be a distraction to our dogs. Beds will be inspected, sheets and blankets will be pulled off beds in order to inspect mattress.**

Thank you in advance for your co-operation!

Acknowledgement; I agree that under no circumstances shall PEST CONTROL PLUS be held liable for direct or indirect injuries or damage to the building premise or contents stemming from the treatment. I, the client, waive any claims of liability against PEST CONTROL PLUS directly or indirectly caused by PEST CONTROL PLUS products, equipment or staff.
